## Market today

## Risk of testing a previous low

The SET has weak and negative technical indicators, limiting any recovery to resistances of 1380 and 1390; the index is likely to weaken with supports at 1360 and it is very likely to fall to test a previous low of 1350.

## Today's highlights

- The Atlanta Fed expects the Fed to reduce interest rates by 25bps just once this year due to strong economic data and slowing inflation.
- Russia has ordered companies to reduce oil production in 2Q24 to achieve a production target of 9mn bbl/day by the end of June. Market expectations are affected by concerns about drone attacks on Russian oil refineries, which could cut production by up to 10%.
- Large commercial banks in China sold US dollars to buy Chinese yuan in the onshore market to stabilize the yuan's value after a significant depreciation.
- The EC is investigating five cases involving three major US tech companies: Apple, Alphabet, and Meta Platforms, under the EU's Digital Markets Act (DMA).
- Intel and AMD stocks dropped after news China is enforcing new regulations to phase out the use of US-made processors in Chinese government computers and servers, narrowing the uses of Intel and AMD chips from the US.
- The Ministry of Finance announced progress on the Bt10,000 digital wallet project, confirming 50mn people will receive Bt10,000 in 4Q24. The major digital board will meet on Apr 10 to finalize details before submitting the proposal to the cabinet for consideration.
- The Parliament will review the draft Bt3.48tn Budget Act for FY2024 today and is expected to pass it today. The government will then announce its implementation, expected to take effect in mid-April.

## Strategy today

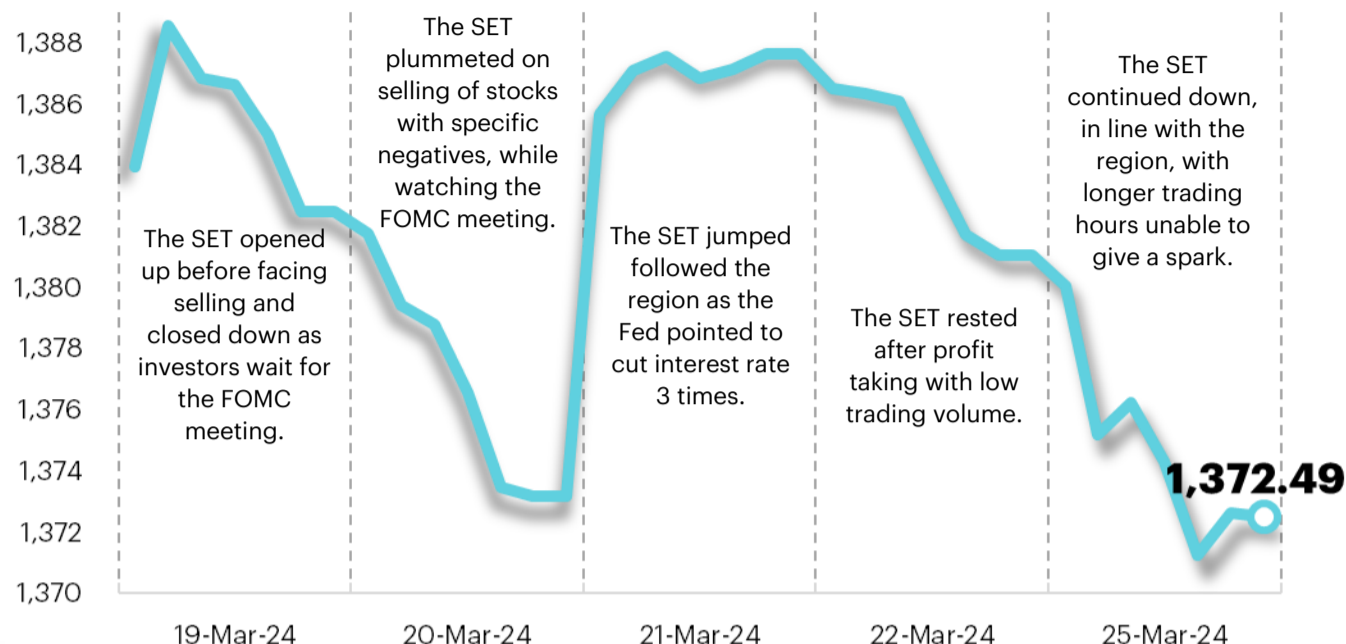

In the short term, the Thai capital market is expected to recover after China's economy showed signs of recovery in the manufacturing sector and investment, which might help Thailand's manufacturing production index (MPI) rise after a fall of 2.9%YoY in Jan. The Fed signaled three interest rate cuts this year, as expected. The strategy is "Selective Buy".

## Support - Resistances

1360/1350 - 1380/1390

## Trading today

In the short term the SET is expected to recover from better Chinese economic figures and Fed signals that it will relax monetary policy. We recommend "Selective Buy" in three main themes:

- 1) Speculative stocks after Brent price exceeded US\$85/bbl, with demand supported by lower recession concerns and the effect on supply from Russian and Ukraine tension. For **high risk-takers**, we recommend trading PTTEP (long-term oil price up by US\$1/bbl raises target price by Bt5/share) and TOP (refinery margin and inventory gain); the rise in price is negative to oil retailing (low marketing margin) and the aviation sector (higher cost).
- 2) Speculative stocks on the beginning of a downtrend in interest rate – finance (TIDLOR), utilities (GULF) and transportation (AOT).
- 3) Technically speculative stocks after prices have broken out of a downtrend and NVDR began to turn to a net buy in March – IVL, GULF, PTTGC and GPSC.

## Daily top picks

**BCP:** The company benefits from rising oil price. 1Q24 profit will be supported by stronger GRM and stable oil price; 2024 core profit is forecast to grow 12%, underwritten by contribution from BSRC and a better E&P business. Valuation is not expensive, trading at PER of <5x. Recommend buy for trading today at not more than Bt44.50/share.

**AP:** Top pick in the property sector. 2024 net profit is expected to make another new high at Bt6.3bn, growing 4.8%, supported by strong growth and backlog. Financial status is stable and it is a high-quality dividend stock, with a high dividend yield of 6.9% expected.
