Fraser's Property Thailand Industrial
Freehold & Leasehold REIT

FTREIT

Bloomberg FTREIT TB
Reuters FTREIT.BK

Capturing the relocation theme

We initiate coverage of FTREIT with an OUTPERFORM rating and end-FY2025 DDM-based TP of Bt11/sh (6.3% WACC and 0.3% LTG). Since 72% of its leasable area is freehold, we also assume a terminal value of 72%. We like FTREIT for: 1) the high portion of freehold assets, 2) a proven track record of stable income even during COVID-19 and 3) decent yield at 9.3% in FY2024F and IRR at 8.8%. Despite the uncertainty over policy rate cuts by the Fed and BoT, demand for relocations out of China, primarily manufacturing (~45% of rental income) will support share price.

Largest industrial estate REIT. FTREIT is Thailand's largest industrial estate REIT, with 702 properties - 363 factories and 339 warehouses - as of Mar 2024, with total net leasable area of 2.27mn sqm (59% warehouses and 41% factories). The trust is well-diversified, with the top ten tenants accounting for only 24% of rental income and the largest contributing just 6.9%. In terms of industry, the three main contributors are logistics (32% of rental income), electronics (22% of rental income) and automotive (19% of rental income). A large 72% of its leasable area is freehold, with just 28% leasehold (remaining life is 20.5 years). The trust has the largest freehold portion compared to peers.

Proven track record of growing dividend and high portion in EEC. The trust paid a dividend even during COVID-19, supported by resilient warehouse and factory demand. Its quarterly dividend rose steadily from Bt0.167/unit in 1QFY19 (Oct-Dec 2018) to Bt0.187/unit in 2QFY24 (Jan-Mar 2024), driven by growing asset size with a 3-year CAGR (FY2020-FY2023) of 5.5%. The trust benefits from the EEC theme since 58% of its leasable area is in EEC, with occupancy rate at a high 84.4% as of Mar 2024. We also see limited downside for REIT stocks overall as yield spread, which is the difference between REIT dividend yield and 10-year Thai government bond yield, is at 6.7% which is over +2SD, making dividend yield attractive. IN VX also believes the Fed will start cutting its policy rate in Nov 2024, which would act as a catalyst for the stock.

FDI and BOI in 1Q24 still show good momentum. According to Thailand's Board of Investment, FDI numbers and BOI applications were solid. FDI, in terms of numbers of projects, grew 131% YoY to 460 projects and surged 16% YoY in terms of value to Bt169.3bn. BOI applications leapt 94% YoY to 724 projects and 31% YoY to Bt228.2bn in terms of value. This data suggests Thailand is attractive for those relocating out of China to reduce geopolitical risk.

Valuation. We estimate the fair value of FTREIT at Bt11/sh at end-FY2025F based on DDM methodology to capture its decent dividend. We assume a 6.3% discount rate and 0.3% terminal growth. We also assume a terminal value on the 72% of its leasable area that is freehold.

Risks and concerns. Rising bond yield and a weak global economy that will primarily hit the warehouse segment, which accounts for ~55% of rental income. However, our assumptions already assume a warehouse occupancy rate of 84-85%, quite stable from 2QFY24. Additionally, the shutdown of the automaker represents another risk to monitor.

Value proposition

FTREIT owns factories and warehouses, with a total area of over 2.3mn sq.m., in major industrial zones of Thailand, such as Ayutthaya, Pathum Thani, Samut Prakan and the Eastern Economic Corridor (EEC). When purchased, the properties were leased by global companies in different sectors, such as advanced automotive, logistics and electronics.

Business outlook

We have positive view on its business outlook from relocations out of China to reduce geopolitical risks. FTREIT is positioned to benefit as all of its assets are located in major industrial zones of Thailand and also has both factories and warehouses.

Bullish views	Bearish views
1. Benefits from relocations out of China and majority of its assets are freehold.	1. Although bond yield has peaked, the timing of interest rate cuts is still uncertain.
2. Decent IRR and yield.	2. A weak global economy may damage its warehouse segment which accounts for 55% of total income.

Key catalysts

Factor	Event	Impact	Comment
Latest development	Trust raised capital to repay debt in 4Q23	Positive	This was done to lower debt taken on to acquire new assets in 2023.
Near-term earnings outlook	3QFY24F earnings momentum	Relatively flat QoQ, but growing YoY	YoY growth will be driven by revenue from new assets acquired last year.
Factor to be aware in FY2024	Potential new asset injection	Positive	Normally, the trust adds new assets every years.

Sensitivity Analysis

Factor	Earnings impact	TP impact
5ppt change in occupancy rate	7.2% in FY2024F	Bt0.1/sh.

Our view on ESG

The REIT manager recognizes its social obligation and adheres to the policies of business conduct with fairness, anticorruption practices, respect for human rights, fair treatment of employees, consumer responsibility, environmental protection and stewardship, social and community development collaboration, and obtaining and sharing of innovation derived from responsible operation to society, the environment, and the stakeholders.

ESG Disclosure Score

Bloomberg ESG Score	n.a.	CG Rating	DJSI	SETESG	SET ESG Ratings
Rank in Sector	n.a.	FTREIT	-	No	Yes

Source: Thai Institute of Directors (IOD), SET

Environmental Issue (E)

- FTREIT has a policy to move towards net zero carbon by 2050.
- The trust has changed the light fixtures in factory and warehouse buildings from 400 watt Metal Halide High Bay to 150 watt LED High Bay lamps, saving energy consumptions and expanding lifetime.

Social Issue (S)

- FTREIT has a clear procedure for its social responsibility policies by identifying the stakeholders, identifying the impact of FTREIT on stakeholders, rating the influence level of stakeholders towards FTREIT, grouping the stakeholders and prioritizing the importance of stakeholders.

Governance Issue (G)

- The REIT manager realizes the importance of good corporate governance, holding that it is crucial for the management of FTREIT and unitholders.
- The REIT manager will manage FTREIT in accordance with the relevant laws, Trust Deeds and other related regulations.

Thailand's leading industrial REIT

Fraser Property Thailand Industrial Freehold & Leasehold REIT (FTREIT), initially known as TICON Freehold and Leasehold Real Estate Investment Trust (TREIT), was established on December 12, 2014. It was launched with a registered capital of Bt3.4bn. BBL Asset Management, the Trust's trustee, appointed Fraser Property Industrial REIT Management (Thailand) Co., Ltd. (FIRM) as the REIT Manager. Fraser Property Industrial (Thailand) Co., Ltd. serves as the Property Manager, and Thailand Securities Depository Co., Ltd. acts as the trust registrar.

FTREIT plans to raise funds from investors to acquire, lease, and/or sub-lease immovable properties. It gains revenue via leasing, sub-leasing, transferring or disposing of its properties. It also intends to further generate income through developing and improving properties, which includes securing construction permits and whatever else is necessary.

Fraser Property (Thailand) Public Company Limited (FPT), the major unitholder of the REIT Manager and the trust's sponsor, is a leading real estate developer in Thailand. FPT provides FTREIT with the rights of first refusal for its industrial and logistics properties, contributing significantly to growth. It also invests in third-party properties to further enhance growth. Its portfolio of high-quality industrial and logistics properties in prime locations in Thailand attracts leading local and international companies across various industries.

Figure 1: REIT structure

Diverse assets across strategic locations

As of 2QFY24 (Jan–Mar 2024), the REIT's principal investments comprise ownership and leasehold rights in real estate, with a focus on warehouses and factories. The portfolio includes 339 warehouses, offering a combined rental area of ~1,334,805 sqm, and 363 factories, with rental space of 931,585 sqm. In total, the REIT manages about 702 units, covering an aggregate rental area of ~2,266,430 sqm.

Broken down into freehold and leasehold, 72% of its NLA is freehold with 28% leasehold with an average life of 20.5 years. In terms of asset type (based on NLA), 59% are warehouses and the remainder are factories. In terms of location, 58% of its NLA is located in the EEC, 23% in northern Bangkok (Bangkok, Ayutthaya, and Pathum Thani) and 19% in central Thailand (Samutprakarn and Prachinburi).

Rental structure and historical performance

The trust's rental & service income is derived from renting out and servicing factory and warehouse space. Income is based on the type of contract - rental or service or both.

Warehouses: These occupy 59% of the rental area with an occupancy rate of 84.3% and an average rental and service rate of Bt151/sqm/mth.

Factories: These account for 41% of the rental area, with an occupancy rate of 87.6% and an average rental and service rate of Bt183/sqm/mth.

As of 31 Dec 2023, average occupancy rate of the total portfolio is 85.7% with a combined average rental and service rate of Bt165/sqm/mth.

We note that the trust releases its rental rate once a year, which means the figures above are based on FY2023.

Figure 4: Breakdown of performance by asset type as of Dec 2023

Type of assets	Portion based on NLA (%)	Average occupancy rate (%)	Average rental rate (Bt/sqm/mth)**
Warehouse	59	84.3	151
Factory	41	87.6	183
Total	100.0	85.7	165

Tenant profile

The current tenants renting properties from the trust, both factories and warehouses, operate in a diverse range of industries and no single industry dominates. The most represented industry groups are logistics, electronics, automotive and retail, in that order.

The majority of the current tenants renting properties from the trust are Japanese, followed by tenants from European countries, other Asian countries ex Japan, Thailand, and the United States, in that order.

Note that the proportion in terms of industry and nationality are based on rental income.

Figure 6: Revenue breakdown by industry as of Mar 2024

Source: FTREIT and InnovestX Research

Figure 7: Revenue breakdown by nationality as of Mar 2024

Source: FTREIT and InnovestX Research

To reduce concentration risk, the trust's top ten tenants account for 24% of rental income, with the largest contributing 6.9%. This helps ameliorate the impact of the loss of a key tenant.

Figure 8: Revenue breakdown by top ten tenants as of Mar 2024

No	Industry	Nationality	% of gross rental income
1	Logistics	German	6.89
2	Trading/Retail/Wholesale	Thai	3.58
3	Logistics	Indonesia	3.24
4	Logistics	Japanese	2.33

Industry outlook

Supply outlook for vacant land in industrial areas

In 2022, ~38,500 rai of vacant land was available in industrial estates and this is expected to drop to ~37,800 rai in 2023. This represents a decrease of 700 rai over one year. In the medium term (2024-2027), the rate of increase in vacant land designated for industrial purposes is expected to expand at an estimated compound annual growth rate (CAGR) of ~0.7%. By 2027, the forecast is for ~39,300 rai of vacant industrial land.

Currently, there are several projects totaling ~11,547 rai either under development or in the planning stages. Adding this to the land under development by the Industrial Estate Authority of Thailand (IEAT), ~16,494 rai in industrial estates is expected to be completed over 2024-2027. Chonburi and Rayong provinces remain the most sought-after locations due to their proximity to ports, facilitating transportation, as well as their relative immunity to flooding. Additionally, these areas are part of the government's Eastern Economic Corridor (EEC) project, designated as a special development zone, and to which it provides special support for economic activities in the industrial sector.

Demand outlook for vacant land in industrial areas

In 2022, demand for the purchase of vacant land was 30,069 rai (78.1% occupancy rate). In 2023, this demand is projected to be at 29,862 rai, implying 79% occupancy rate. The strong demand is attributed to accelerating development of industrial estates by entrepreneurs to support investment in the expanding manufacturing sector.

In the medium term, the demand for purchasing vacant land is expected to continue increasing, albeit at a more modest CAGR of 0.5%. By 2027, it is anticipated that the demand for the purchase of vacant land will be 30,890 rai.

Figure 9: Supply of vacant land in industrial areas

Source: SCB EIC and InnovestX Research

Figure 10: ...and demand

Source: SCB EIC and InnovestX Research

Supply outlook for ready-built factories

In 2022, the supply of ready-built factory was approximately 2.39mn sqm. This is expected to grow to 2.4mn sqm in 2023, an increase of 10,000 sqm or 0.4% YoY. This growth is aimed at supporting the expansion of the Thai economy and accommodating a shift in production bases related to supply chain adjustments and geopolitical risk diversification. This is particularly relevant for the industries involved with electric vehicles (EV), spurred by increasing demand, especially from China, which fully reopened early in 2023.

Over the medium term, the supply of ready-built factories for rent is projected to grow at a CAGR of 2.3%. By 2027, the supply of factory space for rent is estimated at 2.59mn sqm.

Demand outlook for ready-built factories

In 2022, the demand for ready-built factories was 1.9mn sqm and this is projected to grow to 2mn sqm in 2023, representing a growth of 7.4% YoY. Occupancy rate in 2023 is expected to reach 85.1%, rising from 2022's 79.6%.

Looking ahead through 2027, ready-built factory demand is anticipated to grow at a CAGR of 1.5%. By 2027, demand for this type of factory space is expected to be 2.2mn sqm.

Figure 11: Supply of ready-built factories

Source: SCB EIC and InnovestX Research

Figure 12: ...and demand

Source: SCB EIC and InnovestX Research

Supply outlook for warehouses

In 2022, warehouse supply came to 4.4mn sqm and this is expected to grow to 4.7mn sqm in 2023, a growth of 290,000 sqm or 6.6% YoY, backed by factors supporting Thailand's economic expansion, such as consumption growth, increasing demand for smart warehouses in e-commerce, wholesale and retail businesses and various production sectors aiming to enhance efficiency and reduce management costs. Additionally, the revival of tourism is expected to boost product consumption.

By 2027, warehouse supply is projected to grow at a CAGR of 3.4% to 5.5mn sqm.

Demand outlook for warehouses

In 2020, warehouse occupancy rate slipped to 84.9% from 89.4% in 2019 impacted by COVID-19, which put the brakes on the economy and thus on rental space demand. During the pandemic, some operators were forced to close their businesses, while others cut back on space rental to cut costs. In 2022, warehouse demand was 3.9mn sqm and this was projected to rise to 4.3mn sqm in 2023, an increase of 270,000 sqm or 6.8% YoY, driven by continued growth in wholesale and retail trade value backed by rising domestic consumption and the resurgence of foreign tourism, which has expanded the demand for products. However, risk factors such as a slowdown in imports and exports may temper this growth. 2023 occupancy is estimated at 88.2%. Warehouse demand is expected to grow at a 3.5% CAGR, with a projected demand of 4.9mn sqm in 2027.

Investment highlights

Proven track record, with dividend growth and growing asset size

FTREIT consistently paid quarterly dividends even during COVID-19 and has a dividend payout policy of not less than 90% of adjusted net profit at least two times a year. The trust also has a good track record of growing its asset size. In FY2020, the value of its investment properties was Bt42.9bn and this has risen to Bt50.4bn in FY2023, implying 5.5% CAGR. The steady expansion in asset size underwrites the rise in dividend growth.

Figure 15: Continuous growth in asset size

Source: FTREIT and InnovestX Research

Figure 16: ...and in dividend per unit

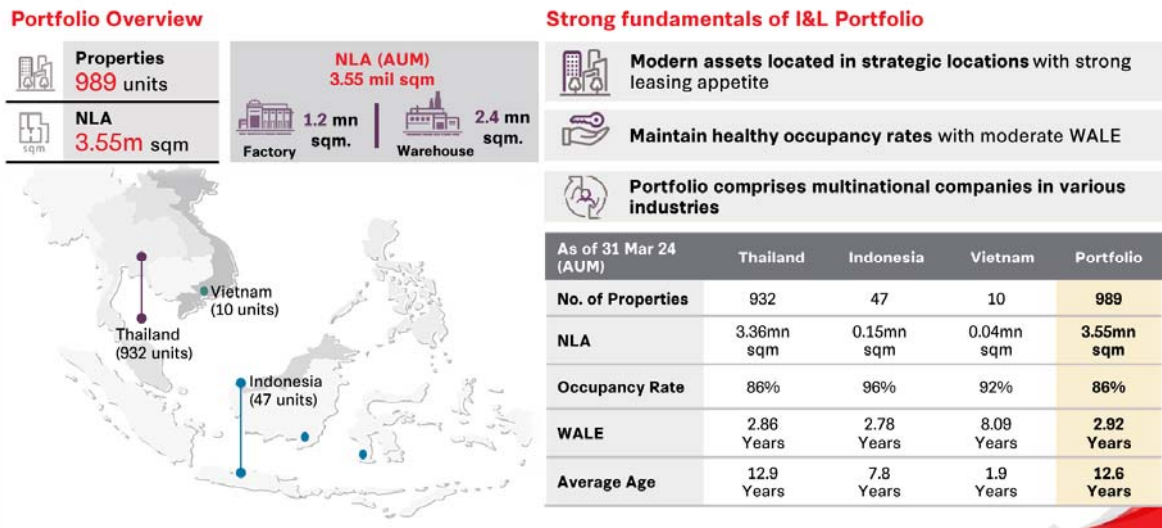

Source: FTREIT and InnovestX Research

Strong through multinational sponsor

Fraser's Property (Thailand) (FPT), established in 1990 and listed on the Stock Exchange of Thailand in 2002, is a subsidiary of Fraser's Property Group, a multinational company that develops owns and manages a diverse, integrated portfolio of properties. The group has businesses in 25 countries in Southeast Asia, Australia, Europe and China and has total assets under management of ~US\$43.6bn. One benefit of the strong sponsor is a steady injection of more assets.

Figure 17: FTREIT has a well-known sponsor

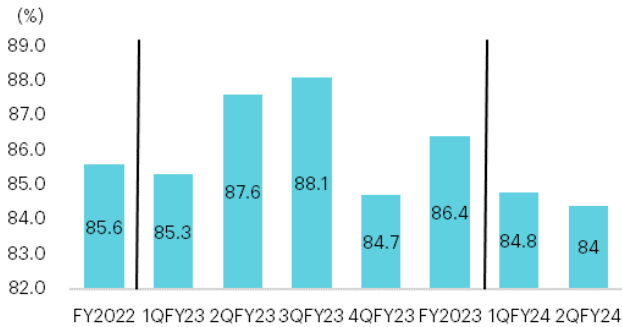

Source: FTREIT and InnovestX Research

58% of its leasable area is in EEC

The Eastern Economic Corridor, commonly referred to as EEC, is an area the government is focusing on promoting and developing, working through the BoI (Board of Investment) to attract foreign companies to the area. Of note, 80-90% of Thailand's FDI flows into the EEC and 58% of FTREIT's leasable area is also in the EEC. This will help undergird demand for its rental properties. As of FY2023, the occupancy rate of its assets in EEC was 86.4%.

Figure 18: Occupancy rate for assets in EEC

Source: FTREIT and InnovestX Research

Figure 19: Most assets are in EEC

Source: FTREIT and InnovestX Research

Downward trend of bond yield to begin in Nov and yield spread is attractive

Historically, rising bond yield is negative for REIT stocks as it makes their yield less attractive. 10-year Thai government yield is highly correlated with 10-year US Treasuries yield and INVX expects the Fed to start cutting interest rates in November 2024, which helps limit the downside for REIT stocks. We also see little chance the Fed will raise interest rate further, implying bond yield already peaked.

Figure 20: High correlation between US and Thai 10-year bond yield

Source: Bloomberg Finance L.P. and InnovestX Research

Figure 21: Rising bond yield is negative to REIT stocks

Source: Bloomberg Finance L.P. and InnovestX Research

In addition to limited downside, we see current dividend yield as attractive. We look at the yield spread, which is the difference between dividend yield for the REIT sector and 10-year Thai government bond yield. This is above +2SD or at 6.7% which suggests that the current yield level is decent.

Figure 22: Yield spread is attractive

Source: Bloomberg Finance L.P. and InnovestX Research

Financial outlook

Expected DPU of Bt0.75-0.79/sh for FY2024F-FY2030F and IRR of 8.8%

Our assumptions conservatively assume a drop in the occupancy rate for warehouses to 84.2% in FY2024 from 86.2% in FY2023 and slightly pick up onwards. The reason behind the drop in FY2024 is that some expiring contracts have not yet been renewed and we conservatively assume the trust will be unable to find a replacement in FY2024. For the factories, we assume occupancy rate will grow to 88.8% in FY2024 from 86.1% in FY2023 as factory space will benefit most from the relocation theme.

We assume an annual rental growth rate of 0.1% for warehouses and 0.5% for factories which is in line with its 4-year CAGR (FY2019-FY2023).

Based on these assumptions, we expect the trust to pay a dividend per unit of Bt0.75-0.79/sh over FY2024F-FY2030F, implying an IRR of 8.8%.

Note that FTREIT performed strongly both during and after COVID-19. FY2023 dividends have already surpassed pre-COVID level, pointing to the resiliency of its cash flow.

Figure 23: Expect stable and rising dividend

Source: FTREIT and InnovestX Research

Valuation

We use the dividend discount model to value the trust in order to capture the decent dividend. Our assumptions are based on a 6.3% discount rate and 0.3% terminal growth. We assume a terminal value on the 72% of its leasable area that is freehold. We derive an end-FY2025 TP of Bt11/sh. We like FTREIT for: 1) a decent IRR at 8.8%, 2) a proven track record of stable income even during COVID-19, 3) the high portion of freehold assets and 4) benefitting from the relocation theme.

Risks

Rising bond yield

Since a REIT stock is considered as a dividend stock, rising bond yield reduces the stock's attractiveness because it narrows the yield gap. However, INVX believes bond yield is approaching peak and we thus see limited risk from rising bond yield.

Tenants do not renew contracts

Based on its expiry profile, 15.3% of its rental income will expire in 3Q-4QFY24. Of these, 7.2% have already renewed. Then in FY2025 another 29.5% will expire and 26.4% in FY2026. If tenants decide not to renew and the trust cannot find a replacement, our dividend assumptions would be at risk. However, we see the risk as low due to its track record: for the past three years, it achieved a renewal rate of 77.8% in FY2021, 84.5% in FY2022 and 81.8% in FY2023.

Figure 26: Expiry profile

Source: FTREIT and InnovestX Research

Figure 27: Renewal rate

Source: FTREIT and InnovestX Research

Loss of key tenants

The loss of key tenants would have little effect on near-term operations since the top ten account for only 24% of rental income, its diversification ensuring the impact is minimal.

Corporate Governance Report

The material contained in this publication is for general information only and is not intended as advice on any of the matters discussed herein. Readers and others should perform their own independent analysis as to the accuracy or completeness or legality of such information. The Thai Institute of Directors, its officers, the authors and editor make no representation or warranty as to the accuracy, completeness or legality of any of the information contained herein. By accepting this document, each recipient agrees that the Thai Institute of Directors Association, its officers, the authors and editor shall not have any liability for any information contained in, or for any omission from, this publication.

The survey result is as of the date appearing in the Corporate Governance Report of Thai Listed Companies. As a result, the survey result may be changed after that date. InnovestX Securities Company Limited does not conform nor certify the accuracy of such survey result.

To recognize well performers, the list of companies attaining "Good", "Very Good" and "Excellent" levels of recognition (Not including listed companies qualified in the "no announcement of the results" clause from 1 January 2022 to 31 October 2023) is publicized.

¹OISHI was voluntarily delisted from the Stock Exchange of Thailand, effectively on September 6, 2023

²SFP was voluntarily delisted from the Stock Exchange of Thailand, effectively on July 19, 2023

³TCCC was voluntarily delisted from the Stock Exchange of Thailand effectively on August 25, 2023
